

ESTABLISHED IN 1995 / BRYANSTON, SOUTH AFRICA

Technology is personal. So is our approach.

IT solutions and support for the people behind your business.

COMPUREP brings your cloud environment, security and everyday IT operations into one practical plan.

Our home in Bryanston, Gauteng

ONE PARTNER. THREE CONNECTED PILLARS.

Microsoft Cloud | Cybersecurity | IT Operations

Managed IT Excellence / Aligned Technology / Empowered Business

A CONNECTED VIEW OF YOUR TECHNOLOGY

One partner. Three connected pillars.

Start with what needs to work better. Shape the solution around your people, systems and priorities.

01 Microsoft Cloud

THE CHALLENGE

Email, files and access feel fragmented, and subscriptions are difficult to navigate.

HOW WE HELP

Plan licences, migrations and collaboration around your people. Connect Microsoft 365, identity and Azure with agreed administration and support.

Collaboration / Cloud infrastructure / Licensing / Automation

02 Cybersecurity

THE CHALLENGE

Inconsistent security settings and unclear recovery plans can leave business data exposed.

HOW WE HELP

Review access, devices and email, prioritise improvements, and define backup and recovery requirements. Agree the controls and workloads in scope.

Identity and access / Endpoint and email security / Backup and recovery

03 IT Operations

THE CHALLENGE

Everyday IT requests interrupt work, while maintenance and supplier issues fall between teams.

HOW WE HELP

Bring user support, device administration, networking and hosted voice into a practical operating plan. Add procurement, web and hosting support as needed.

Managed IT / Consulting / Networks and voice / Hardware, web and hosting

Services, products and licensing are confirmed for your environment in the agreed scope.

OUR JOURNEY AND YOUR NEXT STEP

Relationships first. Then, now and next.

Sean Booyesen established COMPUREP in 1995, initially helping people with their everyday IT needs. Client referrals and word of mouth helped the business grow into infrastructure, networking and ongoing support for business systems.

Our next chapter focuses on stronger cloud foundations, security and IT operations, with practical automation and clear technology roadmaps. Personal service and accountability remain central to that ambition.

Choose how we work together.

Outsourced IT

You need an IT team.

We manage an agreed set of responsibilities, from everyday support and administration to maintenance and supplier coordination.

Co-managed IT

You need extra capacity.

Keep your internal team in place while COMPUREP takes on defined tasks, specialist work or an operational backlog.

Projects and advice

You have a focused goal.

Bring a migration, recurring issue or planned change. Agree the scope, delivery responsibilities and handover before work begins.

Clarity you can use.

An assessment can turn a concern into practical decisions. Your team retains business decisions and access approvals. Depending on scope, outputs may include:

Systems assessed and key dependencies
Prioritised issues and options

Owners for the next steps
A documented plan and handover

CONNECTED ACROSS BORDERS

South African roots. International reach.

Based in Bryanston, we provide onsite and remote IT services and support in South Africa, with remote services and support for clients around the world.
