

COMMUNICATE & GROW

Business Communications & Web

Bring your business identity into everyday email, calling and website interactions.

Make communication more consistent while keeping ownership, subscriptions and ongoing responsibilities clear.

A useful starting point for

Businesses improving email branding, cloud calling or their website and hosting arrangements.

What we can scope

- Plan centrally managed email signatures and approved campaign banners.
- Map cloud PBX call flows, extensions and device requirements.
- Assess number-porting and connectivity dependencies.
- Plan website content, responsive design and useful visitor journeys.
- Agree domain, DNS, hosting, maintenance and renewal responsibilities.

Your written quote confirms the selected inclusions.

Understand the proposal**Subscriptions & usage**

Signature licences, hosting, domains, calling subscriptions and usage are separately identified.

Design & setup

Artwork, website delivery, call-flow setup and migration work are scoped projects.

Ongoing care

Content updates, administration and technical support follow the agreed care or service plan.

Clear expectations

- These services can be selected separately; choosing one does not include every other service in this overview.
- Your proposal confirms content ownership, access, renewal terms, changes and handover responsibilities.
- Calling availability, porting and integration depend on the selected providers and the existing environment.

For your first conversation

- Brand assets and authorised content approvers
- Domain, website and calling requirements
- User counts, existing providers and renewal dates

A summary is enough to start. Do not send passwords, recovery codes or access credentials.
